Managing Upgrades to Shared Resources(e.g. interface, JRE)

JVM Upgrades

Java is installed by Salt.

New JVM editions will include an updated cacerts file, and the certificates used for interserver authentication. The default JVM cacerts password is "changeit".

keytool -import -trustcacerts -alias "commonidtrust-root" -file /path/to/newcacert.pem -keystore /usr/lib/jvm/java-1.7.0-openjdk-1.7.0.19.x86_64/jre/lib/security/cacerts}}
