Introduction

Netgurus is a group of highly motivated individuals that get together to contribute and learn from each other for the betterment of the broader education and research community. Typically, they meet before or after a conference to discuss items of interest. Many times, topics are suggested ahead of time to encourage participation. Meetings are limited to 30 attendees and are selected on a first come, first serve basis. The limit exists to allow discussion to progress in an orderly fashion.

Netgurus is a manifestation of the sense of community Internet2 helps to provide. To participate in this workgroup, [subscribe](mailto:netgurus@internet2.edu) to the <netgurus@internet2.edu> mailing list. You are encouraged to edit this wiki space and contribute to the development of this workgroup.

Next Netgurus will be held in conjunction with the [2022 Internet2 Technology Exchange](#).
