

CE-PAG Notes - Public
Wednesday - 7/27/2022

5-minute Updates:

- In-person convening events
 - Leadership Exchange in Denver, CO in October, 2022
 - Hoping to catch those who could not attend in May
 - Coordinating with EDUCAUSE, working on joint communications
 - Planning to convene the day before EDUCAUSE begins
 - Feedback
 - Looking forward to learning more about how that mutual support works out between Internet2 and EDUCAUSE
 - Great timing for people who are going to attend both
 - EDUCAUSE registration is now open, some folks might already be making travel arrangements. Communications about the Leadership Exchange should go out soon so that people can adjust their travel plans
 - Internet2 planning to get that messaging out soon
 - Some people might be going to The Gartner IT Symposium/Xpo the week before and are already committed to those travel plans
 - Technology Exchange in Denver, CO in December, 2022
 - Excited to be bringing back I2I scholarships
 - Proposed events for 2023
 - Community-wide Exchange - Spring, 2023
 - Technology Exchange - Fall, 2023

Discussion Items:

- Sustaining Contributions 2023 & 2024
 - Recap NAOP/CE PAG joint meeting on 7/13/22
 - Thank you to those that were able to make that meeting and who provided feedback
 - The input gathered at that meeting was tremendously helpful
 - The Board of Trustees decided that we will remain committed to what we had communicated to the community: Staying with a 3% increase at most for 2023

- Community Engagement team to share that with the community ASAP
 - Internet2 re-commitment to work through the CE PAG about sustaining contributions and fees in the future
- Updates from Board of Trustees meeting July 25-26 in San Diego, CA
 - Presented an overview to Board w/ goal of providing a path towards a more thorough understanding & a chance for them to ask questions
 - History of dues, design of current model, plan for the upcoming years and what has been communicated to the community
 - Included historical information on not only Sustaining Contributions but also fees for InCommon and other revenue sources, shared by VPs from each division
 - Task Force to be assembled
 - Will have reps from the Board of Trustees, the PAGs and Community. Supported by Internet2 staff. Chair will likely be someone from the Board of Trustees
 - Will have a set timeframe (potentially 6-8 months) so that announcements can be made to the community in the Spring of next year
 - Task For will be tackling how to achieve long term sustainability while keeping in mind the impact of inflation, our own costs of services, etc
 - Task Force and Board will be addressing what we may need to do in 2024, might need to consider going above the 3%, perhaps up to a 5% increase in SCs, understanding that Internet2 will also make adjustments to reduce the burden on the community
 - Will be discussed in both the Task Force and this PAG
 - If there is a sense that there may be compromises made, that level of detail will be very important for the community to provide input on where the compromises are best made
 - Examine all opportunities for adjustment (knobs to turn) in an open and transparent way with the community - particularly the Task Force and PAG
 - Help community understand how membership sustains I2, what's the value we continue to bring
 - Program and Priorities Committee (PPC) to be reactivated
 - To meet in the coming months

- Will help with the Strategic Planning framework and vision for Internet2
- Much of their work is related to with the Board's Task Force
- Discussion
 - Regarding the order of operations, should the strategic plan come first to inform the fee review?
 - This feedback will be shared with Internet2
 - Due to a sense of urgency around communicating with the community, there was interest in creating the Task Force ASAP
 - At the Leadership Exchange earlier this year in May, the value prop issue surfaced repeatedly, and it goes hand in hand with the order-of-operations discussion. The strategic plan will reveal the value prop, and how that could then be supported by fees, etc.
 - Intermediary step while strategic plan being proposed: Engage the community before drastic changes are made to the fee structure (like via a town hall meeting)
 - Would also be great to share w/ community what was presented to the Board on sustaining contributions and what's the state of the Network, NET+, eduroam, etc
 - Important that things like long range modeling get shared with the community too
 - The three Internet2 VPs should come together and provide that to the community
 - Regarding Strategic Planning work, Internet2 has engaged a consultant, Ron Kraemer, to help with the process. He has been conducting interviews with staff to help define a process and a timeline. Maybe bring Ron to the meeting in August to provide an update?
 - There was some discussion that Internet2 should change their fiscal year (currently calendar year) to match the community's fiscal year to be better aligned
 - Our plans for the following year get solidified between January and May, so guidance in Jan or Feb for the following year is ideal

- Would be good to tie any increase of that magnitude to some exciting strategic initiatives
- When you *react* to a disaster you look bad, but when you *predict* them you look good!
- Does it make sense for this PAG to invite Jeff and/or Howard to join us in August to share some of the details that were presented to the Board? Keeps us in the loop and allows us to be knowledgeable supporters
 - Perhaps a joint meeting with NAOPpag? Might have more info on the task force by then, too
 - No objections to a joint meeting and inviting Jeff/Howard and Chair of Task Force
 - Perhaps we can host this time and invite the NAOPpag to our Aug 24th meeting
 - Want to remain engaged, good way to do that is through dialogue

Reminders: Next CE PAG meeting: Wednesday, August 24, 2022
