InCommon Online Forum, March 30, 2010
Background information for the conversation with Steering.

InCommon Steering Committee

The InCommon Steering Committee is responsible for the business and affairs of InCommon and its federation, including oversight and recommendations on issues arising from federation operation and management.

Kevin Morooney, Penn State – Chair
Jack Suess, UMBC – Vice-Chair
Steve Cawley, University of Minnesota – Treasurer
Joel Cooper, Carleton College – Secretary
Mark Crase, California State University
Chris Holmes, Baylor University
Ken Klingenstein, Internet2 (ex officio)
Tracy Mitrano, Cornell University
John O'Keefe, Lafayette College

Stephanie Reel, Johns Hopkins University
Chris Shillum, Elsevier
Craig Stewart, Indiana University
Shel Waggener, UC Berkeley

Advisers:
Renee Frost, Internet2, University of Michigan
Rodney Petersen, EDUCAUSE (ex officio)
David Wasley, retired, UCOP

New: Online Education and CAMP

InCommon has introduced two new online education series and is now the sponsor of the CAMP (Campus Architecture and Middleware Planning).
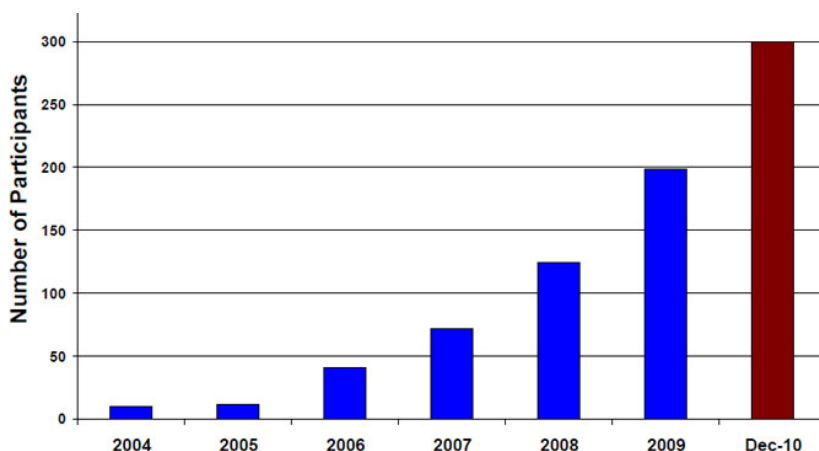

The monthly **IAM Online** series (www.incommon.org/iamonline), offered in cooperation with EDUCAUSE and Internet2, features identity management topics. The monthly **InCommon Online Forum** (www.incommon.org/forum) includes conversations with InCommon Steering and the InCommon Technical Advisory Committee, as well as updates from InCommon collaboration groups. All sessions are archived — just follow the links above.

CAMP—June 21-23, 2010 in Raleigh, North Carolina — provides a face-to-face opportunity to immerse yourself in federated identity management and has sessions for newcomers as well as those already in production. **Advance CAMP**—the second identity services summit — will take place June 23-25, also in Raleigh, and focus on open source projects. For information and registration for CAMP or Advance CAMP, go to www.incommon.org/camp.

InCommon Partnerships

InCommon's outreach program has worked diligently to reinforce partnerships with EDUCAUSE, Jasig, Kuali, and other organizations. EDUCAUSE is working with us on CAMP and the IAM Online series. Jasig and Kuali are partners in the advance camp. In addition, the new Affiliate Program will allow participants to connect with commercial or non-profit organizations that provide software, content, guidance, support, and implementation and integration services related to participating in the federation. For more information, see www.incommon.org/affiliate.

InCommon Participants
(210 as of March 19, 2010)

This chart demonstrates the growth of InCommon since 2004; the gray bar represents the goal for 2010. We need your help in reaching this goal. Please talk to colleagues about the value of InCommon and let us know of vendors that you'd like to see as sponsored partners.
