

Campus Identity Governance

Brice Bible, Chief Information Officer, Ohio University

Mark Rank, Middleware Architect, University of Wisconsin-Milwaukee

William Schmoekel, Director of IT Services, Owens Community College

Moderator: Rodney Petersen, Managing Director Wash Office, EDUCAUSE

Questions

- Why are you establishing (or considering) governance for identity management at your institution?
- What, specifically, are you doing at your institution?
- What is identity governance? What activities or functions are considered within scope?

Questions

- Who is (or should be) involved?
- What is the appropriate role for IT versus other campus stakeholders?
- What role does your governance body play in addressing privacy considerations such as data access?

Questions

- How does identity governance relate to IT governance, information security governance, or data governance?
- What are you doing at the system or state level?
- What impact does “federation” have on governance discussions at the local level?

Questions

- What impact could the National Strategy on Trusted Identities in Cyberspace (NSTIC) and its emphasis on the national identity ecosystem have on governance?
- What are your ongoing challenges for identity governance?
- What is the organizational and operational relationship between identity management and information security at your institution?

THANK YOU
