“Balkanized” Institutional Organization (hyper-decentralization)

Advising “Tools” and “Systems”

(We have a lot of them...)

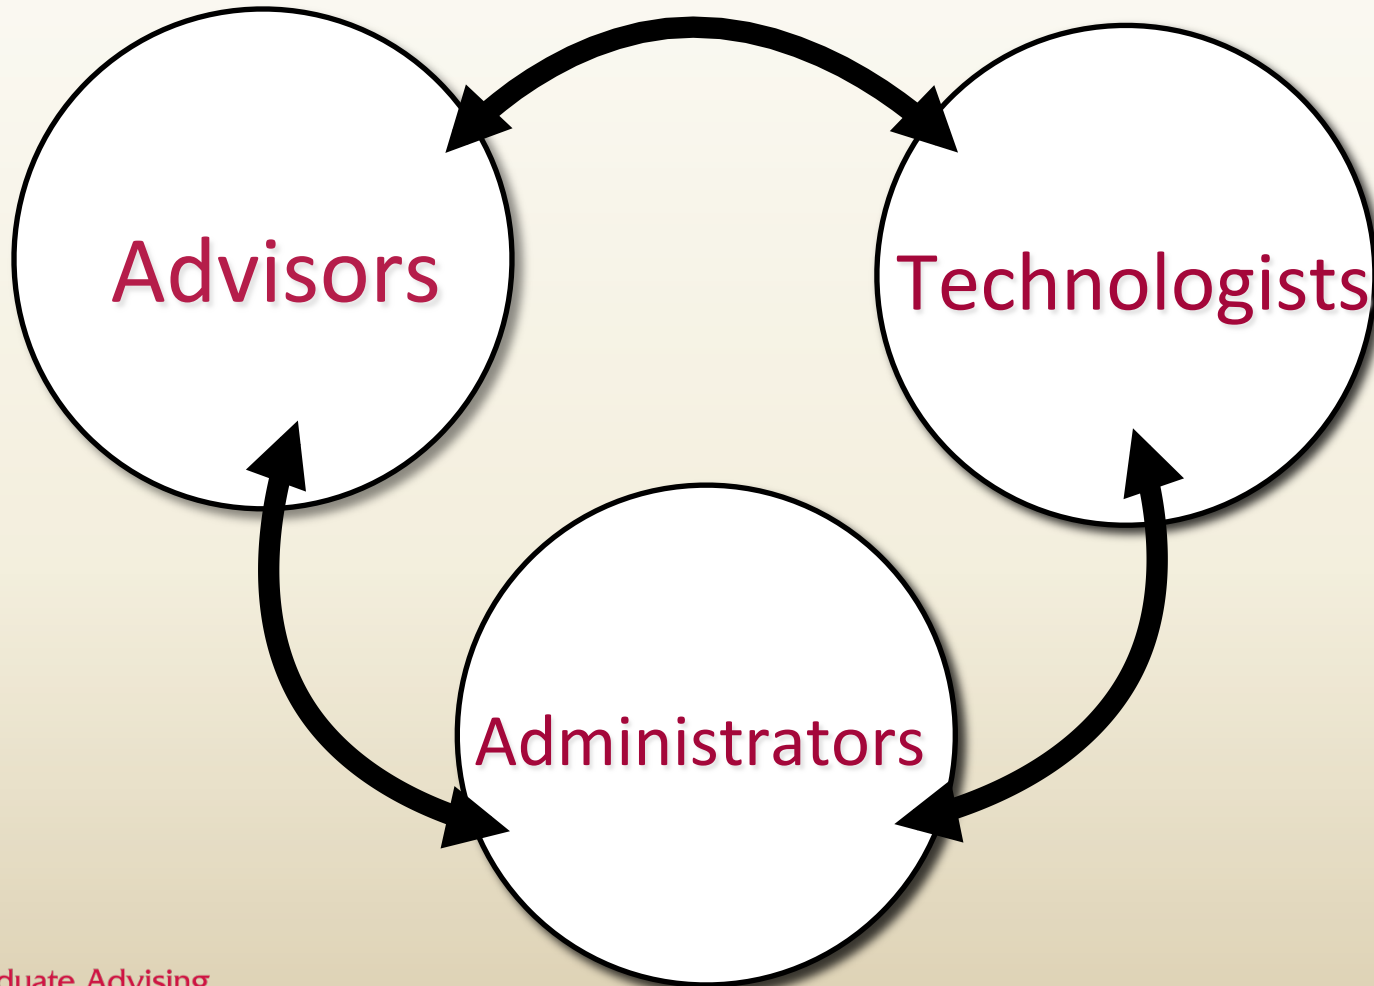

The collage features several overlapping screenshots of web-based advising systems:

- Academic Program Summary:** A portal for students to view their academic progress, including search filters for name, ID, and campus.
- mycourseguide:** A tool for finding courses, instructors, and degree plans.
- WiscList:** A list of honors programs with columns for name, gender, status, and completion dates.
- Scholarships@UW-Madison:** A page listing various scholarship opportunities with details on eligibility and application deadlines.
- SOAR Advising Module:** A student profile page for Bridgette Allen, showing her program code, degree plan, and advising status.
- Calendar:** A Gantt-style calendar showing advising appointments for a student named Bridgette Allen across several days.
- Academic Advisor Assignments:** A page showing assigned advisors and their contact information.
- UW-Madison My Account:** A central hub for students to manage their profile and access various services.

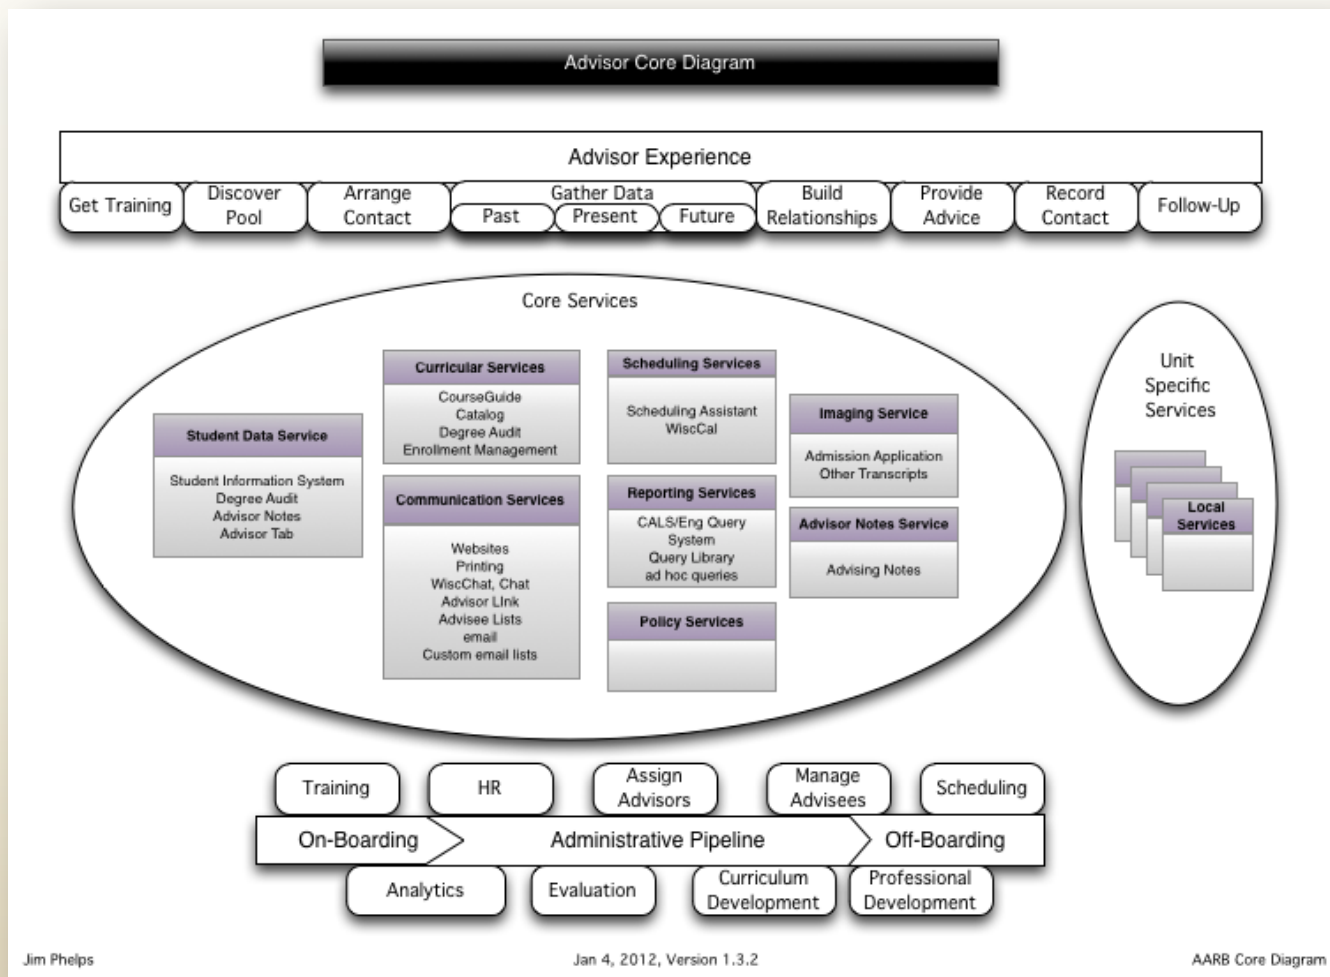

Moving Toward Coherence

- Advising Architecture Review Board (AARB)
- Strategic approach to meeting needs
- Needs of one domain (advising) used to drive/leverage institutional change
- Central coordination and support of a decentralized endeavor

Advising Architecture Review Board (AARB)

Increased Understanding through Enterprise Architecture

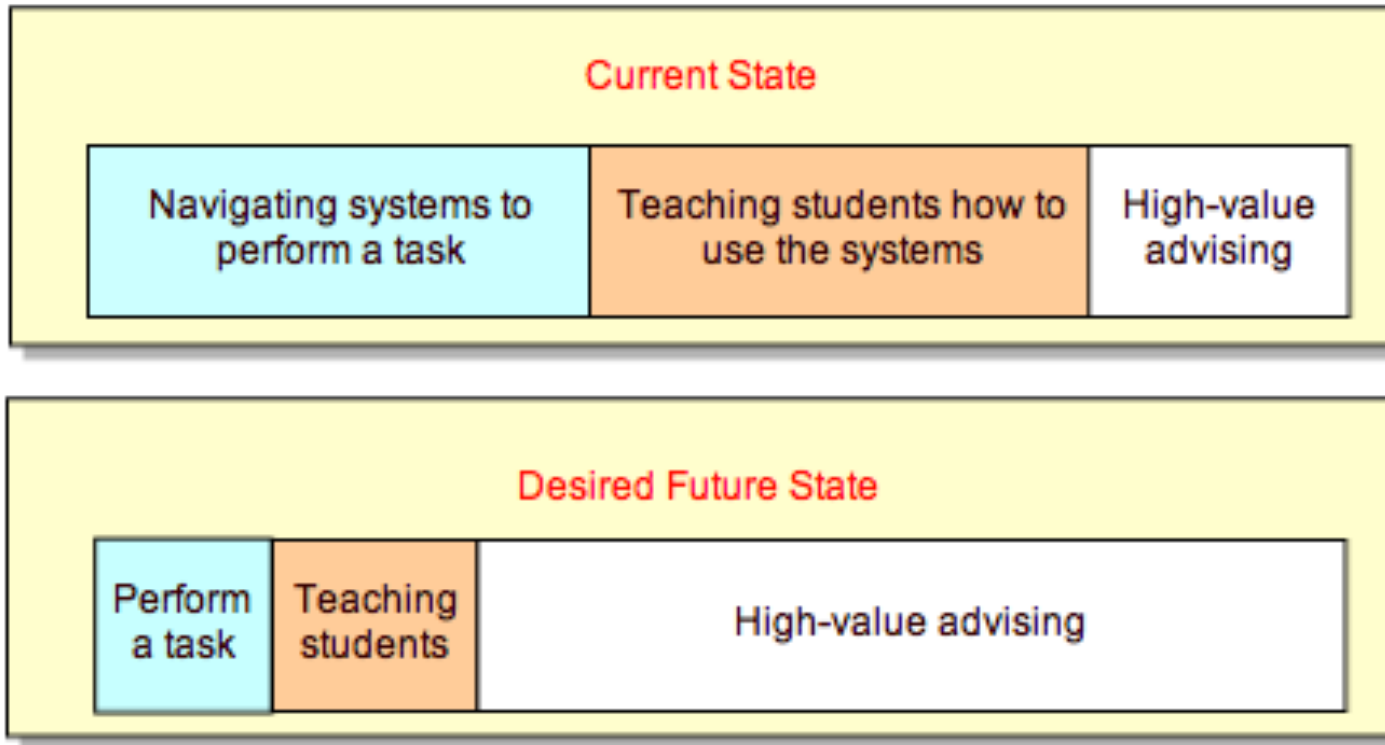

What does the future hold?

- Provide advisors/students with intuitive, easy to use systems and tools for their work
- Provide advisors/students with direct, easy access to the information and data they need for their work
- Ensure the data and information provided to advisors/students are accurate, timely, and appropriately sourced
- Tailor the tools and data provided to advisors/students to their particular needs based on role, division, unit, etc.

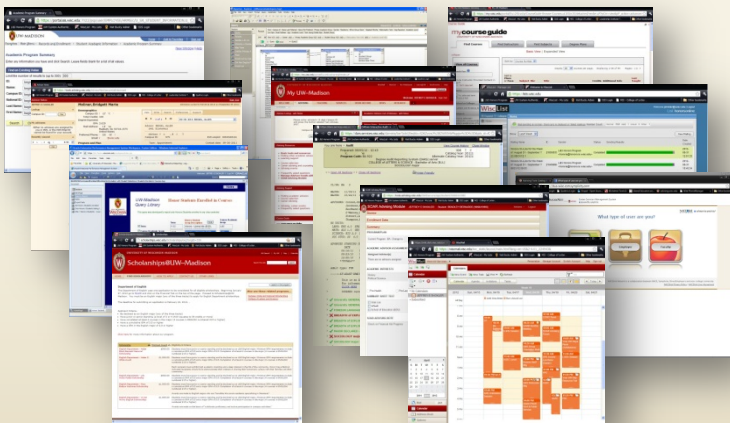

Real-World Impact?

Reduce Struggle and System Complexity = Big Win

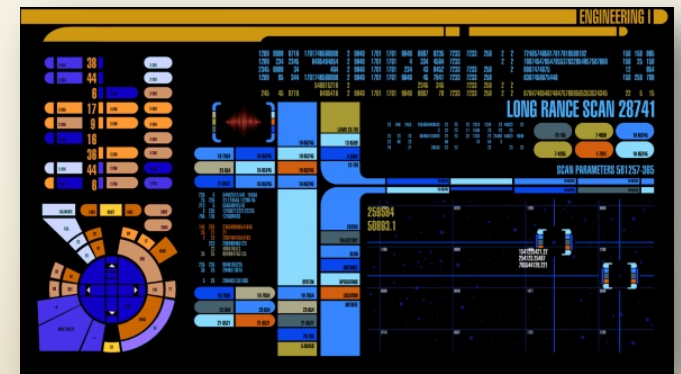

Division of time in an advising appointment

When, exactly, is all this magic gonna happen?

Point A

Point B

Thank you.

Questions? Comments? Curiosities?
