Dear Internet2 IOT Innovation Working Group,

Welcome to the inaugural Internet2 Internet of Things (IOT) Innovation Working Group newsletter. There is so much interesting information and so many events regarding the Internet of Things that we can benefit from, that we thought we might share some of them.

We will include topics and documents of interest including reports, presentations, and event information. If you have input please send it to CINO@Internet2.edu.

Attached in this newsletter are:

1. Reports and Presentations
   - US Federal Trade Commission (FTC) staff report – Internet of Things Privacy & Security in a Connected World, January 2015
   - Security and Privacy Strategies for Expanded Communities – Florence Hudson and Deven McGraw presentation at Academic Medical Center Security & Privacy Conference, Chapel Hill, North Carolina, June 2015
   - Biomedical Device Security: New Challenges and Opportunities presentation – Florence Hudson with Mayo Clinic & Symantec at the Academic Medical Center Security & Privacy Conference, Chapel Hill, North Carolina, June 2015
2. Events:
   - Smart and Programmable Cities workshop, Bristol, UK. July 7, 2015. For more information look at this link http://www.bristolisopen.com or contact Inder Monga (imonga@es.net).
     - Presenters include Inder Monga from ESnet as well as professors and leaders from University of Bristol, Barcelona, King's College London, British Telecom, BBC, JISC/Janet, NEC.

Best,

Florence
