

# netFORUM Source

- [Modes](#)
- [Configuration](#)
- [Performing Searches](#)
- [See Also](#)

The netFORUM Organizational Identity Source Plugin is designed to integrate with the [Abila netFORUM Association Management System](#) via the XML API (xWeb).

## Modes

Org Identity Source Mode	Support
Manual Search and Linking	Supported
Enrollment, Authenticated	Not supported
Enrollment, Claim	Not supported
Enrollment, Search	Supported
Enrollment, Select	Supported

Org Identity Sync Mode	Support
Full	Not supported
Query	Supported
Update	Supported
Manual	Supported

## Installation

This is a non-core plugin, see [Installing and Enabling Registry Plugins](#) for more information.

This plugin requires PHP to be built with SOAP support (`--enable-soap`).

## Configuration

In order to use the netFORUM Source Plugin, you must first obtain xWeb credentials from your support contact.

**Testing With The netFORUM Sandbox**

The netFORUM Sandbox environment invalidates email addresses by inserting an extra dot (.), eg: `juser@.gmail.com`, and as such certain functions (such as Enrollment Search) may not work correctly against the Sandbox environment.

## Performing Searches

The current integration requires the use of separate SOAP endpoints for each search type (name, email address). If more than one search type is requested, the results will be OR'd together.

Event registrations are stored separately from membership records, but can be queried for purposes of OIS Group Mappings. If enabled via the plugin configuration, the customer key will be used to retrieve events the member is registered for, and the Event Product Code will be used as the string for group mapping. ⚠️ Event registrations are only supported in the Pro edition.

Committee memberships are stored separately from membership records, but can be queried for purposes of OIS Group Mappings. If enabled via the plugin configuration, the customer key will be used to retrieve committee memberships. ⚠️ Committee memberships are only supported in the Enterprise edition.
