

16 November 2007

InC-Student Notes from 11/16/07

- Karen Hanson - Wisconsin
- Keith Hazelton - Wisconsin
- Nancy Krogh - Idaho
- RL Bob Morgan - Washington
- Karen Schultz - Penn State
- Ann West - EDUCAUSE/Internet2

Next Call

Friday December 21 at 3:00 pm
877-944-2300
99208#

Stay tuned - the next call may be cancelled due to Holiday Proximity.

Notes

Updates/Announcements

- Bob - Microsoft is planning to offer services to students and wants to use federated identity to verify enrollment for access. Stay tuned. The service should be rolled out in the next 2-4 months.

- Bob- StudentUniverse.com offers online discount travel tickets to students. They would also like to use federated identity to have campuses verify student enrollment to qualify to purchase their tickets.

- Nancy - The Liberty Alliance project has released "An Overview of the Id Governance Framework" at <http://www.projectliberty.org/liberty/content/download/3500/23156/file/overview-id-governance-framework-v1.0.pdf>. They are looking for comment. EDUCAUSE Annual Conference Discussion - Joanne
The Registrar Meeting went well and attendees asked good questions about drivers and terminology after Joanne's presentation. Representatives from the Quali Student Project were there too and we talked with them afterwards about coordinating efforts.

AACRAO IdM Workshop - Nancy/Ann
Nancy/Ann had a discussion with AACRAO on Wednesday about an IdM Workshop (name TBD) to bring together campus Registrar/IT pairs to further planning on their campus and give input into a community whitepaper.

We plan to have a combination of open registration and selective recruiting to help move discussion along. We will most likely have a diverse audience - some will be familiar with the concepts and some will not - so we'll have to do an introductory session.

Group discussed various methods of doing this:

1) first half day could be for new folks
second half day could be those who have experience

2) morning of the first day will be a tutorial then go into the two half days.

Bob suggested that a paper be drafted beforehand to provide background for the attendees and enable review of the content on the spot. The resulting document will be more complete upon first public release. We could also develop a possible planning tool that could be used/reviewed during the meeting. Having participants read these ahead of time also provides a way of self-selecting whether they need to attend the introductory session, if offered. Bob offered to help with drafting the white paper.

Scoping is still an issue. How much of IdM do we include in the whitepaper/program?

We could also survey the participants about their knowledge and campus environment to help the program committee assemble the program topics.

A separate discussion centered on surveying the AACRAO membership on the top 10 issues. IdM probably wouldn't appear, but components of IdM would. Maybe we should include such a discussion on the program?
