The InCommon Community Assurance call on March 1 featured Ken Klingenstein of Internet2 who led a discussion of the evolution of the NIST Special Publication (SP) 800-63 Electronic Authentication Guideline specification now known as the Digital Identity Guidelines. NIST is in the process of revising this important publication, and a 90-day comment period is underway until March 31, 2017. The InCommon Assurance Advisory Committee is hosting this webinar both to provide information on the changes to 800-63 and to highlight the ways for you to provide input.

Presenter

Ken Klingenstein, Internet2

Host

Brett Bieber, University of Nebraska - and Chair 2017 of the InCommon Assurance Advisory Committee (AAC)
