Internet2 Health Network Initiative Workshop

This meeting brought together individuals interested in using advanced networks in health care, focusing on FCC Rural Health Care Pilot Program (RHCPP) participants and organizations that will be connecting to the Internet2 Network. It was a continuation of the successful meeting held in April of 2008. The netcast archive is available at the link provided below as is the agenda. The workshop showcased a panel of participants relating their experiences as well as representatives from several federal agencies describing how the agencies are supporting health care.
