

Trust and Identity Update Webinar Sept. 29, 2017

Trust and Identity Update Webinar: InCommon, TIER, and Plans for the Future

Friday, September 29, 2017

2 pm ET / 1 pm CT / Noon MT / 11 am PT

The Trust and Identity Services division at Internet2 is heading towards its second birthday this January and a lot has transpired over the last two years. We started with several planning sessions last year and have been working to put those plans into action. There are a number of initiatives underway at InCommon (thanks in part to the dues increase this year), and we continue to develop and refine the TIER Program and its core software components. We'll share that information, as well as provide a foreshadowing of what to expect at TechEx, which is just a couple of weeks away.

Please join InCommon Steering Chair Sean Reynolds and Trust and Identity Program Advisory Group Chair Klara Jelinkova in a recap of the last two years, a foreshadowing of what to expect at TechEx, and learn how you can participate in helping to set the course for Trust and Identity activities at Internet2 for the next couple of years.

Speakers

Klara Jelinkova (Rice Univ.), Chair, Trust and Identity Program Advisory Group

Sean Reynolds (Northwestern Univ.), Chair, InCommon Steering Committee

Kevin Morooney (Internet2), Vice President, Trust and Identity

Connecting

We will use Adobe Connect for the webinar, including slide sharing and audio: <http://internet2.adobeconnect.com/trustandidentityupdate>

Back-up phone bridge: (734) 615-7474 or (866) 411-0013. PIN: 0178270#
