

COnmanage Directory Technical Manual

Welcome to COnmanage Directory

COnmanage Directory is a web front end for an LDAP Directory.

COnmanage Directory

- [Installation](#)
- [Directory Data Model](#)

COnmanage is the set of products that provide the Identity Management facilities for the COnmanage platform. Deployers of a COnmanage instance can select and customize only those products that make sense for their environment. This technical manual is targeted towards the administrators of a COnmanage instance as well as application developers.
