

September 14 Online Forum Focuses on Cert Service

InCommon Online Forum: The InCommon Cert Service

Tuesday, September 14, 2010

1 p.m. EDT / Noon CDT / 11 a.m. MDT / 10 a.m. PDT

InCommon has launched a new certificate service, providing unlimited certificates at one low fee. The research and higher education community developed this service for pragmatic reasons (primarily to reduce costs) and innovative reasons (the first real step toward signed email and second-factor authentication).

If you have signed up for the InCommon Cert Service, or are interested in more information, join this InCommon Online Forum webinar "The InCommon Cert Service."

John Krienke, chief operating officer of InCommon, will provide an overview of the service and address policy questions. Dedra Chamberlin and Karl Grose, both of the University of California Berkeley, will address questions and issues related to implementation. UC Berkeley piloted the service and has the first implementation up and running.

Details and background information for the InCommon Cert Service are at www.incommon.org/cert. InCommon is an operating unit of Internet2.

Host:

- John Krienke, Chief Operating Officer, InCommon

Guest Speakers:

- Dedra Chamberlin, Manager, CalNet (identity and access management services), University of California Berkeley
 - Karl Grose, programmer/analyst, University of California Berkeley
-

Connecting

We use Adobe Connect for slide sharing and audio, and we will use the chat function for questions.
