

Assign someone to be able to manage a group

- [Summary](#)
- [Privilege requirements](#)
- [Procedure](#)

Summary

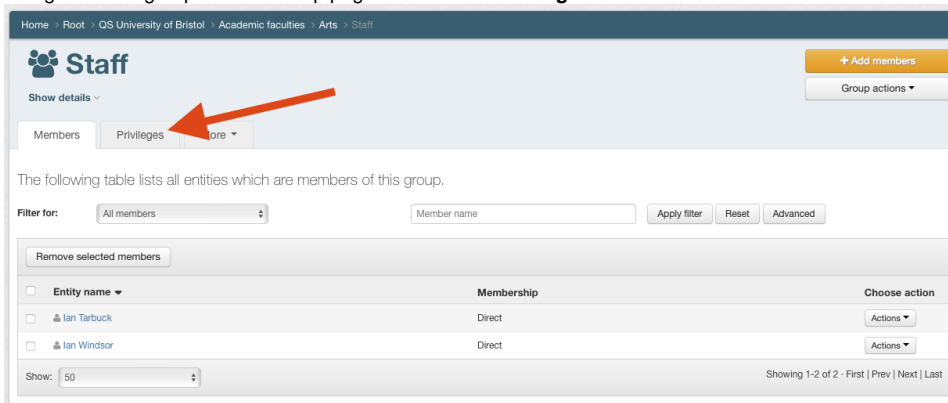

You can assign privileges to an entity or entities (individual users, or a group) to allow them to manage a group. This involves granting either the **UPDATE** or **ADMIN** permission.

Privilege requirements

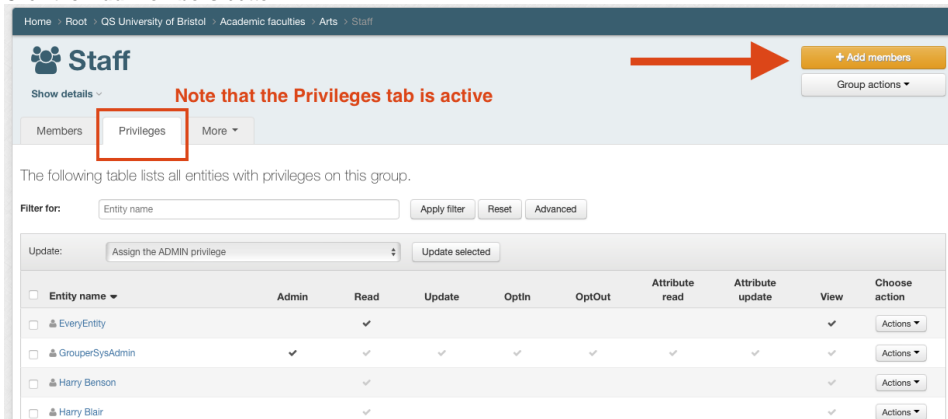

You need **ADMIN** on the group to be able to assign privileges on the group. If you are a Grouper sysadmin you inherently have this privilege on every group.

Procedure

1. Navigate to the group's membership page. Click on the **Privileges** tab.

2. Click the **Add members** button.

3. Enter your search criteria in the **Member name or ID** field, and select the appropriate subject from the list. You can search for an individual person, or a group.

Home > Root > QS University of Bristol > Academic faculties > Arts > Staff

Group actions ▼

Member name or ID:

Enter an entity name or ID, or search for an entity.

Assign these privileges:

MEMBER ADMIN ☒ UPDATE READ VIEW OPTIN OPTOUT ATTRIBUTE READ ATTRIBUTE UPDATE

Add or import a list of members .

- Choose the simplest permission that will suffice, keeping in mind that anyone with ADMIN privilege can rename or delete the group, whether intentionally or accidentally.
- If the user can manage the group, but is not a member of the group, unselect the checkbox for **"MEMBER"**.

5. Click the **Add** button. Note that the selected person or group is now listed in the list of entities with privileges, with the appropriate privilege(s) assigned.
