

EmailAddress Schema

Attributes

- **Version:** 1.0
- Defined types are as configured at a platform (when attached to an Org Identity) or CO (when attached to a CO Person) level. CO-specific types can be determined via the [CoExtendedType API](#).
- Verified cannot be set to true via this interface. Instead, a confirmation request must be triggered.
- See [cm_email_addresses](#) for definitions of other attributes and elements.
