

Internet2 Member Meeting Track Session Proposal

Deadline Jan. 31

The deadline for track session proposals for the Spring 2011 Internet2 Member Meeting is quickly approaching – January 31, 2011. The Spring Member Meeting is April 18-20 in Arlington, Virginia.

Two of the tracks are of interest to InCommon participants: Focus on Federations and Middleware. The program committee encourages track session proposals that share developments, designs, implementations and experiences, and that incorporate elements of the meeting theme "The Path Forward: Envisioning Opportunities." Case studies across disciplines and topic areas are also encouraged.

Details are available in the Call for Track Session Proposals on the Internet2 website: <http://events.internet2.edu/2011/spring-mm/calls-proposals.cfm>

Please forward this message to anyone in your organization that might have interest in submitting a proposal.
