

# Build new grouper client

<a href="#">Wiki Home</a>	<a href="#">Grouper Release Announcements</a>	<a href="#">Grouper Guides</a>	<a href="#">Grouper Deployment Guide</a>	<a href="#">Community Contributions</a>	<a href="#">Internal Developer Resources</a>
---------------------------	---	--------------------------------	--	---	--

If libraries need to be updated in grouper client

1. Look at the libraries in the ext folder
2. Update the version in the parent pom
3. Get the source and refactor the package with search and replace to be in edu.internet2.middleware.grouperClientExt.
4. Run the grouper client tests
