- Pål Axelsson, SUNET
- Sarah Borland, University of Nebraska
- Ercan Elibol, Florida Polytech Institute
- Mike Grady, Liaison from CACTI to CTAB
- Meshna Koren, Elsevier
- Andy Morgan, Oregon State University
- Dave Robinson, Grinnell College in Iowa, InCommon Steering Rep, ex-officio
- Jule Ziegler, Leibniz Supercomputing Centre
- Robert Zybeck, Portland Community College
- Johnny Lasker, Internet2
- Kevin Morooney, Internet2
- Ann West, Internet2

Discussion

- [Intellectual Property reminder](#)

Working group updates

- [REFEDS MFA Subgroup](#)
 - <https://wiki.refeds.org/display/GROUPS/Community+Chat%3A+REFEDS+MFA+Profile+v1.1>
 - Concluded work, material is on wiki, and feedback is invited
 - There will be a chat on the profile on Oct 6
 - This is not yet the formal consultation stage (final stage of accepting edits from the community)
 - It is a pause / sanity check to obtain more feedback before next steps
 - There are some potentially controversial points
 - Question in the past two days: To what extent will issues around fishing motivate more focus on MFA?
- [CACTI](#)
 - talked about the Linking SSO subgroup
- InCommon TAC
 - Talked about REFEDs MFA profile and why there has not been much feedback so far.
 - Also talked about TechEx planning.
 - Neils Van Dyke will come to an upcoming TAC meeting to discuss distributed Identity.
 - InCommon TAC presentation on activities regarding Digital Wallet use/adoption coming up. Intention is to reschedule this.
- [REFEDs Assurance Working Group](#)
 - Completed work on the criteria defining IAP.
 - Now going over the work and getting ready for a rewrite into better prose.
 - The REFEDs Assurance Framework will hopefully go to consultation before TechEx.
 - Criteria are comprehensive.
 - Extends Research Assurance Framework v1.
- Entity Categories Working Group: no update
- SIRTFI
 - [SIRTFI v2 was completed and published](#)
- [SIRTFI Tabletop Exercise](#)
 - This effort is in Phase 1, communications test for organizations who will participate in the exercise in November

Baseline Expectations v2 update - where we stand at late September

- Albert has reached out to all the commercial orgs on the non compliance w BEV2 list.
- Some issues with contacts being incorrect. Hope to get updates.
- Albert has not yet reached out to the Higher Ed orgs on the list. At end of this week Albert will reach out to them
- Some entities are not online, not visible on the internet, thus not scannable
- Implementation guidance says entities should be visible
- <https://spaces.at.internet2.edu/display/federation/meet-baseline-expectations>
- How to handle and clarify requirements? This could be a post BEv2 conversation
- Q: Is there a requirement for re validation of entities over time?
- Albert: This is being discussed
- Idea: Entity will only remain in metadata if it is attested as still valid
- Concern: campus uses certs for WIFI auth. Every year you must re-accept the cert that comes through, this is an end user requirement. IT staff has to hope that users do this before classes
- Suggestion to have an InCommon exec contact and another contact level too
- May look at this more closely in 2023
- We will need to remove some commercial SPs. Starting in October, Albert will start to notify campuses that may be impacted, asking them to contact their vendor.

Recruiting for CTAB - what type of talents/skillsets/influences are we looking for in next years CTAB recruits?

- <https://incommon.org/community/leadership/>
- <https://www.incommon.org/news/bring-your-unique-expertise-to-incommon-advisory-committees/>
- A CTAB member whose term is expiring has the option to stand for election to another term
- Nominations are happening now. New terms start in January 2023.
- We may want to work towards staggered end dates for CTAB seats
- Would be good to have more representation on CTAB from the library and research community
- NIH and NSF representation on CTAB is helpful
- Representation from a commercial SP would be helpful

Next CTAB Call: Tuesday, Oct. 4
