Participants and Requested Topics

Participants and Requested Topics

(i) Let's Get the Conversation Started!

Advance CAMP is designed and delivered for and by you, but we won't know what your hot topics are unless you post them here. Don't be shy! Please use this page to suggest topics for Lightning Talks, Invited Talks, Side Meetings, or other activitities or offer to lead a discussion.

- 1. Go to the wiki login instructions and follow them until step 3 in the Quick Start to create an account in this federated wiki. (You don't have to send your eduPersonPrincipleName [ePPN] to us.)
- 2. Click on Edit in the top right and choose Edit This Page from the drop down menu.
- 3. Click on the last row of the table.
- 4. Add a line by clicking on the Insert Row After icon above and include your suggestions.
- 5. Don't forget to register for the meeting by clicking on the Registration tab on the left.

Name	Organization	Topics Interested in Knowing More About	Expertise or Experience to Contribute	Background or Resource URL	Activities/Side Meetings to Add to the Program	Travel and Arrival /Departure Arrangements
Benn Oshrin	Internet2			COmanage, FIFER , FIFER-API	VO Identity; Registries; Standard APIs for IDM Services; Provisioning Initiatives	
Tom Barton	U Chicago & Internet2		Grouper, access management practices, Level of Assurance	Grouper, InCommon, eduCourse	federated ssh; extra-institutional "people-picking" and profile services like VIVO; enabling course-based access to federated applications	
Michael Gettes	Carnegie Mellon University	Permissions and Authorization - where are we going as a community?			Federation, Inter-federation, we need better UIs in the USA, Invitation based IdPs, why do we need local federations? Identity Services is what we do - what do you do?	
Jim Basney	NCSA			go.teragrid.org, cilo gon.org	FedAppWG, InCommon Silver, InCommon for CI, InCommon SP boarding process, SAML ECP on the command-line	
Boyd Wilson, Billy Cook, Mike Gossett, Jeremy Grieshop, Jeff Bate	Clemson University			AuthN/AuthZ Discussion Diagram	How a general purpose authorization library could be leveraged by different applications for different authorization sources, thus aiding adoption	
Ken Klingenstien					Groups and Federations	
Jens Haeusser	UBC	Enterprise authentication for mobile apps				
RL "Bob" Morgan	University of Washington / InCommon	Federation boarding problem				
Eric Westfall	Indiana University		Kuali Identity Management	rice.kuali.org/kim	Kuali looking to expand functionality of KIM to include more idm functionality, interested in challenges we may face during this, others who may be interested in participating. Federation of research administration (between instances of applications like Kuali Coeus)	
Mike Wiseman	University of Toronto	Non-web federated access. Higher assurance implementation.			federated command line apps, InCommon Silver, SAML ECP.	
Tom Zeller	Memphis	PFC provisioning federations and clouds	standards and implementation community	http://bit.ly/lsSPtu as an example (ucla.edu) Graphs	SCIM, SAML, SPML current events.
