

# InCommon Policy Forum, Certificate Service Session to be Netcast

The InCommon Policy Forum and a track session focused on experiences with the InCommon Certificate Service will be available via Netcast from the 2011 Internet2 Spring Member Meeting on Tuesday, April 19. The Member Meeting site includes a [Netcast schedule with links](#) to the live streams.

---

## **InCommon Policy Forum**

Tuesday, April 19 - 8:45 - 10 a.m. (EDT)

Speakers: Jack Suess, chair of InCommon Steering, will moderate the Forum

The InCommon Policy Forum will include topics of importance developed by the InCommon Steering Committee, as well as those raised by attendees. Topics likely to be discussed include the Identity Assurance Program (also known as Bronze and Silver), user consent to attribute release (with a demo), and federating with the federal government.

---

## **InCommon Certificate Service - Experiences from Deployers**

Tuesday, April 19 - 3-4 p.m. (EDT)

Speakers: Paul Caskey (University of Texas System) and Jim Jokl (University of Virginia)

InCommon operates a community-driven certificate service, providing unlimited SSL and personal certificates for all domains owned and controlled by a college or university. A number of other additional, specialized services are available for a fee, as well. This session will provide an overview of the base service and include a panel discussion about deployment experiences and cost savings.
