MailingList

OpenSAML Mailing List

The OpenSAML project maintains a single mailing list where users/developers may post questions. This mailing list is for those using the OpenSAML library, and not a list for general SAML questions. If you have general SAML questions, please post them to the saml-dev mailing list.

List Archive

Archive at Google Groups

Subscribing to the Mailing List

- Send a message to the address: pubsympa@internet2.edu
- In the subject line of the message include the line: **subscribe mace-opensaml-users FirstName LastName**
  e.g. subscribe mace-opensaml-users John Smith

Unsubscribe to the Mailing List

- Send a message to the address pubsympa@internet2.edu
  In the subject line of the message include the line: **unsubscribe mace-opensaml-users**

Bug Reporting

Before posting a "bug"-type question, you can search the issues list at https://bugs.internet2.edu/ to see if it's already reported or fixed. Bugs might be reported against several different sub-projects (XMLTooling, OpenWS, or OpenSAML itself).

Do **NOT** use the bug reporting system to ask general questions; we will close such entries immediately.
