

Grouper v4 Release Announcement

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

NOT LINKED TO THE GROUPER WIKI HOME PAGE AS OF March 17 2023. Waiting for the downloads page to get updated.

Grouper is an enterprise access management system designed for the highly distributed management and diverse information technology environment common to universities. Grouper is one of the key components in the [InCommon Trusted Access Platform](#).

To learn more about the Grouper 4 release, to download the software and release notes, for upgrade instructions, and a link to a Grouper demo server, please visit: <https://spaces.internet2.edu/display/Grouper/Grouper+Downloads> <<still needs to be updated as of March 17 2023>>

Read about [Grouper Versioning here](#).

For an introduction to Grouper, please see the [Grouper Deployment Guide](#).

Grouper features a comprehensive suite of free [online training videos](#) and an active and supportive user community.

You are invited to visit the Grouper [website](#), [wiki](#), and join the [email lists](#).

Thanks,

Chris Hyzer on behalf of the Grouper Team
