

Membership Update UI

Grouper UI

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

 Starting with Grouper v2.4, membership is handled by default in the New UI, and the Lite UI is no longer available in the standard setup.

Membership list

Showing group members: 1-2 of 2 page size:

Sort by:

  [unverifiedInfo] Chris Hyzer - Protect Network [externalUserID] mchyzer@idp.protectnetwork.org

  users:chicago:tbarton:aGroup

Result page: 1

The membership update screen provides features not offered in the Admin UI:

- Search a large group for a user
- Import a group list from a CSV (Comma separated values) file
- Export a group list to a CSV file
- View/edit membership enabled/disabled dates

There are Ajax controls to improve the usability of the screen:

- Auto complete "drop down" so the user does not have to navigate away from the page to search for data
- DHTML modal dialog to get quick input from the user without navigating away from the screen
- DHTML context menu to fit more functions on the screen without confusing beginner users
