IAM Online May 9, 2012 - Emerging Legal Framework for IAM

IAM Online - Wednesday, May 9, 2012

3 p.m. ET / 2 p.m. CT / 1 p.m. MT / Noon PT
www.incommon.org/iamonline

The Emerging Legal Framework for Identity and Access Management

This session will explain the legal issues raised by identity management, including liability and privacy. It will explore how existing laws and regulations govern identity management activities, and identify the legal barriers that such laws create. Then, building on the ongoing work of the American Bar Association Identity Management Legal Task Force, it will explain how a private contract based legal framework can be constructed to address the requirements for a trustworthy identity system. It will also examine the impact of the proposed NSTIC identity system framework on this process.

Speaker: Tom Smedinghoff, partner at Edwards Wildman Palmer LLP, and chair of the American Bar Association Identity Management Legal Task Force

Moderator: Chris Holmes, Assistant General Counsel, Baylor University, and member of the InCommon Steering Committee

About IAM Online

IAM Online is a monthly online education series including essentials of federated identity management, hot topics from the EDUCAUSE Identity and Access Management Working Group, and emerging topics in IAM. Experts provide overviews, answer questions and lead discussions. IAM is brought to you by InCommon in cooperation with Internet2 and the EDUCAUSE Identity and Access Management Working Group.
