

Proposed Agenda for Social Identity WG at 2012 FMM

Social Identity Working Group at 2012 FMM

Thursday, Oct 4, 2012
7:30 - 8:30 a.m.

Location: Freedom F

[Session Information](#)

Proposed Agenda

- Welcome - *Steven Carmody and Keith Hazelton*
- Review [Internet2 Intellectual Property Rights](#)
- Agenda Bash
- Status Update with Demo on Test Social2SAML Gateway - *Paul Caskey*
 - 15 minutes - Paul giving an inside look @ the tech
 - We could have an interesting panel on how you meet Research CI needs.
- EU participation
 - Paul received email from David Simonsen & Mads Petersen, who are interested (they have an informal group looking at this)
 - Niels van Dijk and Dick Visser have made important contributions on the mailing list
- Deployment Models
 1. Federation-level shared service
 - hosted by InCommon Operations, a Participant institution, or a contracted 3rd party
 2. Institution-level shared service
 - hosted by central IT, a school or college, a department, or a campus-based VO
 3. Entity-level service
 - hosted per-SP using native SP backdoor or simpleSAMLphp or something else
- Implementation Models
 1. lightweight, stateless, passthru gateway
 - easiest to support but may have legal implications
 2. gateway with account linking
 - social identity linked to some Federation identity
 3. Gateway as a Service
 - each campus manages its own gateway instance "in the cloud"
- Policy around Gateways as SP proxies from PoV of social IdPs
- Future Work for SocialIdentity
- Questions / Comments
