

Error Handling URLs in Metadata

Deprecated

Note that this page has been deprecated. The information it contains is no longer current.

This is an ad hoc report on [error handling URLs](#) in InCommon metadata. This report was compiled on October 11, 2012.

Number of IdPs: 265

Number of IdPs with NO errorURL in metadata: 172 (65%)

Number of IdPs with an errorURL in metadata: 93 (35%)

Number of errorURLs probed unsuccessfully: 3

Number of errorURLs probed successfully: 90

Distribution of HTTP responses:

# of errorURLs	HTTP response
57	200
5	301
5	302
1	403
22	404

Anything other than an HTTP 200 response code is considered broken.

If your IdP does not expose an `errorURL` in metadata, please add one. If your `errorURL` in metadata is broken, please fix it.

A [complete list of error handling URLs in metadata](#) is attached to this wiki page. Every IdP in the Federation is included in this list. If a line in the file begins with `NULL`, that IdP does not have an `errorURL` in metadata. If the result code at the beginning of the line is nonzero, the probe for that `errorURL` failed. Otherwise the HTTP response code from the probed web server is listed.
