 - Live for the UH community: <<https://www.hawaii.edu/uhgroupings>> as of September 2018.
 - V2.0 released: basic functionality, replaced prototype PHP app with a Spring Boot implementation.
 - V2.1 released: UI redesign, code improvements, bug fixes
 - V2.2 released: import and export features, grouping descriptions, dynamic sync destinations, Google groups integration
 - V3.0 planned: replace AngularJS with React.
 - Interesting fact:
 - UH students have developed nearly 100% of the code for this application.
