0195240#

Agenda:

Interpretations of critical criteria for which we're providing guidance

Notes

What do we need to change to release the cookbook?

Eric will revise the cookbook to:

- Add ToC to the top
- Update 4.2.3.6 to address new info from AAC
- Normalize structure
- Macro to include outline numbers - David W
- Macro for line numbers - Ann W
- Include spec interpretation section for each criteria

However first we need to verify the interpretation of the spec for which we're providing guidance.

AI - Eric to develop interpretation write up and share with the group before the next call.

On the next call, we'll talk about the wording and get that aligned with the group's view and then Ann will send to the AAC like last time.
