Grouper UI redesign v2.2 issues for Michael Girgis

Date	Who	Priority	Description
28-Dec-2013	Chris	Low	Search icon next to comboboxes is confusing, I removed it
23-Oct-2013	Chris	High	Labels are styled with cursor:pointer, which seems weird since they arent clickable, just curious why this is
7-Oct-2013	TomB	Low	I note that the selection box on the index page extends below the current view in my browser, needing me to scroll the view downwards a bit.
25-Mar-2014	/mrg	Low	Add Members button - what text should be used for "or import a list" - should it be somehow more descriptive given the functions are more than importing?
30-Mar-2014	Chris	High	Screens do not have a lot of help text or tooltips... should we add some of that? Are tooltips accessible and do they work on tablets?
