Trust and Identity: Beyond the Federation

Friday, December 13, 2013

3 pm ET | 2 pm CT | 1 pm MT | Noon PT

www.incommon.org/iamonline

Think InCommon is a federation? Think again. Come join us to learn more about InCommon's expanding role in Trust and Identity for higher education. After conducting a comprehensive review of the identity and access control landscape, Internet2 and InCommon are looking to ensure that all of the various components – tools, software, practices, infrastructure and standards – are consistent, community-focused, and well coordinated.

The InCommon Steering Committee will take a leading and expanded role in Trust and Identity, directing and advising the following areas: services, infrastructure, software, and integration. Join the December IAM Online (December 13, 2013) for a wide-ranging discussion of Trust and Identity and its impact on the research and education community.

Presenter: Jack Suess, UMBC, Chair of the InCommon Steering Committee

We use Adobe Connect for slide sharing and audio: <http://internet2.adobeconnect.com/iam-online> For more details, including back-up phone bridge information, see www.incommon.org/iamonline

About IAM Online

IAM Online is a monthly online education series including essentials of federated identity management, hot topics from the EDUCAUSE Identity and Access Management Working Group, and emerging topics in IAM. IAM Online is brought to you by Internet2's InCommon community and the EDUCAUSE Identity and Access Management Working Group.
