Unicon Webinar on CAS and Two-Factor

Couldn't make the May 21, 2014, InCommon Affiliate Webinar featuring Unicon? The archived recording is available. The webinar features two campus case studies: Implementing two-factor authentication with CAS at Evergreen State College Extending CAS at Indiana University, including two-factor authentication, login interrupts, password expiration policies, and front-channel authentication via SAML.

InCommon Affiliates offer software, support, integration, and consulting related to identity and access management, and other trust services. This webinar series provides an opportunity for affiliates to share ideas and solutions with the community. Unicon provides IT consulting services and support for popular open source IAM solutions such as CAS, Shibboleth, and Grouper.
