

Stabilization Planning

(Review JIRA for relevant tickets)

1. Unit testing
2. QA tier (Need to set up demo servers)
3. QA testing
 - a. Create "Typical User Profiles": Administrator, COU Administrator, Group Manager, Participant, etc
4. User experience improvements
5. Simplify installation and upgrade
6. Bug fixes
7. Search
8. Finish incomplete features related to usability
9. Review XXX in code for associated JIRA tickets and prioritization
10. Documentation
