

AegisUSA Renews as InCommon Affiliate

AegisUSA, a leading Identity and Access Management solution provider with extensive expertise in higher education, has renewed as an InCommon Affiliate.

The InCommon Affiliate Program provides the research and education community with a way to connect with partners able to help build the necessary underlying infrastructure that supports federated access.

"We are thrilled to continue our strategic relationship with InCommon to support the federated identity requirements of the higher education marketplace", said Ralph Armijo, CEO of AegisUSA, "and we are confident in our abilities to quickly and efficiently deploy Shibboleth, CAS, and related IdM solutions in this space. We also look forward to participating in the revised Bronze and Silver certification program updates this year."

AegisUSA is an identity management and access management solution provider with more than 70 higher education clients. The company's solutions include TridentHE, the first identity management software suite designed for higher education. Additionally, AegisUSA provides a set of services and products to support the goals of InCommon, including professional services to implement Shibboleth CAS, and a Federated Identity Appliance for Education.

"We're pleased that AegisUSA continues to find value in the InCommon Affiliate Program," said John Krienke, chief operating officer of InCommon. "Their experience in helping colleges and universities implement federated identity management provides a key benefit for our higher education participants."

ABOUT AegisUSA

Founded in 2004, AegisUSA is a leading provider of Identity and Access Management (IAM) products and services. AegisUSA offers a broad portfolio of cost-effective open standards-based IAM solutions including: Enterprise IAM Suite, TridentHE IAM Suite (focused on Higher Education), and specialized pre-package IAM Appliances. Part of AegisUSA's superior solutions includes employing consistent, standards-based implementation methodologies supporting the entire IAM implementation — not just the software. AegisUSA's technology-enabled methodology delivers a significant reduction in implementation costs and timeframes compared to traditional implementations without AegisUSA. For more information, please visit AegisUSA on the web at www.aegisusa.com.
