 - <https://spaces.at.internet2.edu/display/macedir/Entity+Categories%2C+SPs+and+Registration+Authorities>
 - and collects ePPNs: NOTE: Send your ePPN directly to SteveO (steveo@internet2.edu) and request edit privs on the above wiki page
 - and asked Steve Olshansky to create a mailing list for the group
 - mace-cat@internet2.edu is live
 - all identified team members have been subscribed
- Write up a document explaining the semantics of the container
- Running a registry is nice but definitely not needed at this point
- We need to decide on a home for the spec and the attribute:
 - Some of the options (please comment on your preference inline!):
 - URI under refeds.org
 - [URI under macedir.org](#)
 - urn:mace:something
 - OID
 - IANA registry
- Deadline is late March but sooner wouldn't exactly hurt. The sooner the better - fewer sites to transition at InC.
