

Sprint 01

Time Frame	12 December 2011 - 09 January 2012
------------	------------------------------------

Goals

1. Implement proof-of-concept Directory application on Cake 2.0 framework
2. Design and implement new page header (menu) and footer ("powered by CManage")
3. Initial work for [New Lab Hire At Caltech With LSC and Sponsor](#) use case, up to rendering and handling of form (steps 3 - 5; equivalent to most of "Administrator Enrollment" box of [Registry Enrollment \(Rev 1, Registry 0.9.3 and earlier\)](#) flow)

Backlog

- [All Tickets](#)
- [Unresolved Tickets](#)
- [In Progress Tickets](#)
- [Resolved Tickets](#)

Notes

Order of Work for [New Lab Hire](#) Use Case

1. Login/Sign-Up page (Login option only) ([CO-122](#))
2. New menus ([CO-80](#))
3. Render form based on [cm_co_enrollment_attributes](#) for [cm_co_enrollment_flows](#) ([CO-182](#))
4. Implement valid from/until policies ([CO-81](#))
5. Implement REST call for real time reconciliation (maybe) ([CO-179](#))
6. Implement plug-in/default implementation for reconciliation (maybe) ([CO-186](#))
7. Store data in petitions ([CO-208](#))

Then (possibly for Sprint 02)

1. Notification engine ([CO-207](#))
2. Approval page for CO/COU admin ([CO-183](#))
3. Enrollee logs in and completes own data ([CO-92](#))
