Roadmap

Areas of Work Going Forward

- API's, Policy Languages and Development of Code
  - Finalize components, flows and API's
  - Develop working code
    - stand-alone consent as a service
    - coupled to a Shib IdP
      - controlling an integrated set of token issuing protocols
  - Develop the consent event record and notification services
  - Develop architectures and interactions with OIDC and OAuth

- Informed Consent Support
  - Identify the major information needs for the UI, including graphics, information dialogues, histories, minimal and required attributes, etc
  - Identify sources for information feeds, including metadata, well-known URI and software statements,
  - Deciding content/complexity relative to Refeds discussions, etc.
    - fields, graphics
  - Friendly name/value translation

- Adapting PrivacyLens to the new internals
  - Replumbing PrivacyLens to the new internals
  - Adding UI components to reflect new internal capabilities, such as off-line consent, limited delegation,
  - Refining UI in response to feedback and new research

- Enterprise Management Services
  - Configuration Support
  - Measurement
  - Security
  - Audit Log Management
  - Local application metadata integration
  - Others

- Deployment Discussions
  - Relating to IdP v3 consent
  - Relating to GDPR and the proper/improper use of consent - GDPR and Consent
  - Planning documents and discussion groups
  - Help desk issues
  - Facilitating inter-institutional discussions on deployments

- Internal I2 resources
  - Communications
  - Represent to external constituencies

Putting the pieces together
