

IAM Online Feb. 17 - Registries and Records: The Ties that Bind an IAM System

Registries and Records: The Ties That Bind an IAM System

IAM Online – Wednesday, February 17, 2016

2 pm ET / 1 pm CT / Noon MT / 11 am PT

www.incommon.org/iamonline

What are the business and policy concerns that drive the implementation of a central registry system? How do you ensure consistent and accurate data about individuals when that information might come from multiple locations and sources? How does this impact (and integrate) with such business systems as PeopleSoft, Workday, and others? How you can treat the registry as a master data hub and canonical source for person and other entity data.

Join us for this IAM Online and learn about the experiences of two universities implementing central registry systems -- and how those systems form the backbone of their identity and access management systems. Hear about why central registries were created and required elements for new records. Learn about the successes and bumps along the way. And hear about the registry work that is just getting started as part of the TIER initiative (Trust and Identity in Education and Research).

Join us for this wide-ranging discussion and to pose your questions.

Presenters

Warren Curry, IAM Architect, University of Florida

Chuck Moore, Business Relationship Manager, Penn State

Renee Shuey, Senior Director, Identity Services, Penn State

Connecting

We use Adobe Connect for slide sharing and audio: <http://internet2.adobeconnect.com/iam-online>. For more details, including back-up phone bridge information, see www.incommon.org/iamonline.

About IAM Online

IAM Online is a monthly online education series brought to you by Internet2's InCommon community and the EDUCAUSE Higher Education Information Security Council (HEISC).
